SUMMARY

Frontend Developer with a Mechatronics Engineering background, bringing a systems-level understanding of real-time data and hardware-software integration to modern web interfaces. Builds smooth, animation-driven user experiences with React and GSAP, and has shipped multiple production-style projects spanning state management, API integration, and responsive design. Self-taught in UI/UX — designs and structures every interface directly in code.

EDUCATION

B.Sc. in Mechatronics Engineering

University of Aleppo — Faculty of Electrical and Electronic Engineering

Expected Graduation: July 2027

Relevant coursework: Programming Fundamentals (C++), Artificial Intelligence Fundamentals

PROJECTS

ESP32 Smart Ventilation Dashboard

[GitHub](#) • [Live Demo](#)

Jul 2026

Stack: React 19, Vite, Recharts, custom SVG, WebSocket

- Built a real-time monitoring dashboard connected to ESP32 via WebSocket.
- Developed custom SVG gauges and interactive charts for sensor visualization.
- Built an edge-triggered alert engine with 5-tier severity classification and a 60-second re-alert throttle to prevent notification spam, backed by two-tier audio alerts.
- Implemented multiple fan-control modes and real-time alert system.

BRST — Premium Juice Brand Website

[GitHub](#) • [Live Demo](#)

Apr 2026 – Aug 2026

Stack: React 19, Vite, Tailwind CSS v4, Context API, React Router v7, GSAP, Lenis, Leaflet

- Designed and developed an 8-page brand website using React and Tailwind CSS.
- Created advanced GSAP animations and smooth scrolling experience.
- Built reusable components and interactive store locator with Leaflet.
- Maintained the codebase across 125+ commits with a structured Git workflow using feature branches and pull requests.

Melodiq — Music Streaming Web App

[GitHub](#) • [Live Demo](#)

Mar 2026 – Apr 2026

Stack: React 18, Redux Toolkit, RTK Query, Context API, React Router v6, Tailwind CSS, Swiper.js

- Built a full-featured music streaming app powered entirely by free-tier APIs (Deezer, lyrics.ovh, ipapi.co), removing paid-API/credit-card dependency while preserving full functionality.
- Integrated multiple public APIs with RTK Query.
- Handled real-world API constraints — CORS restrictions, missing-lyrics fallbacks, 403/404 errors — with graceful UI fallbacks throughout.

Crown Clothing Store (E-commerce)

[GitHub](#) • [Live Demo](#)

Feb 2026 – Mar 2026

Stack: React 19, TypeScript, Firebase, Redux, Redux Toolkit, Styled Components, Sass, React Router v6, Stripe, PWA, Testing

- Built a full-featured e-commerce web application with authentication, shopping cart, and checkout.
- Integrated Firebase Authentication & Firestore for user accounts and product data.
- Implemented global state management with Redux Toolkit and responsive UI using React.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Frontend:** React (Vite & CRA), Redux, Redux Thunk, Redux Saga, Redux Toolkit, RTK Query, React Router
- **Styling:** Tailwind CSS, Sass, Styled-Components, Bootstrap, Swiper.js
- **Animation:** GSAP, Lenis
- **Testing:** Jest, React Testing Library, Enzyme
- **APIs & Backend:** REST APIs, GraphQL fundamentals, Firebase (Auth)
- **Tools & Workflow:** Git, GitHub, Vite, AI-assisted development (Claude Code), Stripe Payments
- **Design:** UI/UX design & interface architecture, code-first workflow

LANGUAGES

Arabic (Native) • English(B2)

SOFT SKILLS

Team Collaboration • Problem Solving • Communication
Continuous Learning • Time Management • Adaptability
